Versa Creative | Houston, TX | Jr. Web Developer

To whom it may concern:

I am writing to express interest in the Jr. Web Developer opportunity. My motivation for growing and learning new skills as well as utilizing the experience I have acquired led me to applying to your company.

In my role as a Server Administrator, I worked to resolve issues that may arise server side with client websites. While we were not building websites, a huge part of the job was to maintain them when errors occur between the website and the server it is hosted on. I was able familiarize myself CSS/HTML and PHP coding and how websites function and interact with the server and end user. I gained valuable leadership experience as a Web Advisor Coach, passing along the knowledge I have learned on to new and tenured administrators alike.

In my role as a Freelance Web Developer, I build custom website using WordPress or from scratch. This allowed me to hone my skills as a web developer and leverage the knowledge I gained as an administrator and web coach.

Throughout my career, I have acquired the following professional and interpersonal skills:

- Collaborative
- Excellent problem-solving skills, initiative, and intellectual curiosity
- Highly focused
- Maintain a fast-paced work environment through prioritization of tasks
- Motivated
- Self-starter
- Strong attention to detail
- Strong communicator
- Video editing skills for use on websites, social media, various public uses (LCD displays, etc.)

I have six years of experience applying design and website coding best practices to every project I pursue. I look forward to learning more about this opportunity and I appreciate your consideration. Additionally, I am currently located in Houston, Texas. However, I am able to relocate for this opportunity.

Best,

Adebayo Adewole
